

Wet 'n' Wild Theme Park

Project Overview

Village Roadshow are in the process of developing a new Wet 'n' Wild theme park in western Sydney. As a high value project the development application went via the Part 3A process to the planning minister rather than to the local council. Brown Consulting's Water & Environment Group were engaged to carry out the Integrated Water Cycle Management Plan for the development, which included water demand for the pools, irrigation and facilities such as food services and toilets in the park. The design of stormwater drainage and reuse systems as well as a water quality wetland and reuse pond which double as onsite detention to meet the requirements of the Blacktown City Council and Upper Parramatta River Catchment Trust.
